

TIGOT Innovation Centre - Orkney

With over 700sq.m of office accommodation arranged over two floors, and in excess of 700sq.m of workshop space, the newly completed IC-O ably hosts a wide variety of innovative and successful companies.

The prestigious building offers excellent facilities including large state of the art boardroom, high speed broadband, modern kitchen and welfare facilities, all fully serviced and finished to very high standards.

Located in the heart of the Scottish Government's Low Carbon & Renewables Enterprise Area, the development is also home to Hatston Wind Power's iconic 900kW Enercon wind turbine.

The facility is extremely well positioned within 100m of Hatston Pier, Orkney's principal freight and passenger port which also serves the marine renewables sector and is a popular cruise ship destination. The exciting flagship building is uniquely set to maximise the potential of the innovative companies it hosts.

TIGOT Innovation Centre - Orkney

IC-O provides a unique facility in Orkney situated in an ideal location. Its vision statement is 'to create a unique centre of excellence to support Orkney's next generation of innovative organisations'.
